

INTERNATIONAL A-CLASS CATAMARAN ASSOCIATION

The following interpretation to the A-Class Catamaran Class Rules has been made to be effective 10th August 2017:

CURRENT RULE:

8.1 No part of each hull or hull appendages below the waterline shall be less than 0.75 meters from the centerline.

INTERPRETATION:

The distance between any point of the daggerboard to its closest point on the centreplane of the boat shall be measured through the full range of motion (i.e. extension/retraction, cant and rake) permitted by the daggerboard case configuration and without taking into account the daggerboard deformation produced by forces expected during its normal use while racing.
