

**A Class Catamaran
Rule Change Proposal**

Original:

E.3 DIMENSIONS Hull appendages flush with the bottom of the hull and in all positions after exiting this point until fully down cannot exceed boat beam of 2.300m or be less than 0.750m from boat centreplane.

E.4 DAGGERBOARDS Movable and retractable daggerboards shall be inserted from the top of deck or be capable of being fully retractable into the hull. The distance between any point of the daggerboard to its closest point on the centreplane of the boat shall be measured through the full range of motion (i.e. extension/retraction, cant and rake) permitted by the daggerboard case configuration and without taking into account the daggerboard deformation produced by forces expected during its normal use while racing.

Modified

E.3 DIMENSIONS Appendages cannot exceed boat beam of 2.300m or be less than 0.750m from boat centreplane while racing.

E.4 DAGGERBOARDS Movable and retractable daggerboards shall be inserted from the top of deck or be capable of being fully retractable into the hull. Except for momentarily clearance of debris, while racing, the distance between any point of the daggerboard to its closest point on the centreplane of the boat shall be considered through the racing range of motion (i.e. extension/retraction, cant and rake) permitted by the daggerboard case configuration and without taking into account the daggerboard deformation produced by external forces.
